

## Blue River Water District Residential Rates

A base rate of \$25 per month will be assessed then a \$3.50 per K/gallon (K=1000) will be calculated.

The calculation will be determined by a full 1000 gallon readings.

Example: A reading of 3800 gallon would produce a billing of:

\$25 base fee

plus \$10.50 (3 k/gals x \$3.50)

Total \$35.50

\*The remaining 800 gallons (3800 minus 3000) will be captured in the next billing cycle.
